

# THE MATH ADVENTURES OF STU

You should study this stuff. If you don't, you will never get a job and you will have to work at the dump. I can't believe today is your birthday and you couldn't even get one geometry problem right, little mister.

Dang teacher. Why does Mrs. Iot always check my answers on the computer? Doesn't she know this stuff? I know, I don't. I don't do my homework. It's easy.

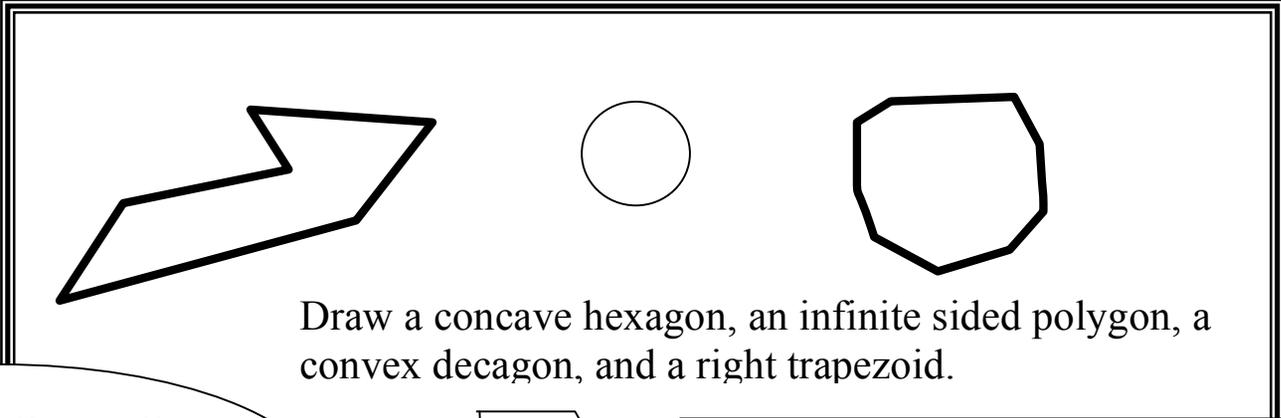

This isn't right! What were you thinking, Stu?  
This is so easy. Show me how you do your homework.

No way. I don't even have my homework.  
This is brainwashing anyway.

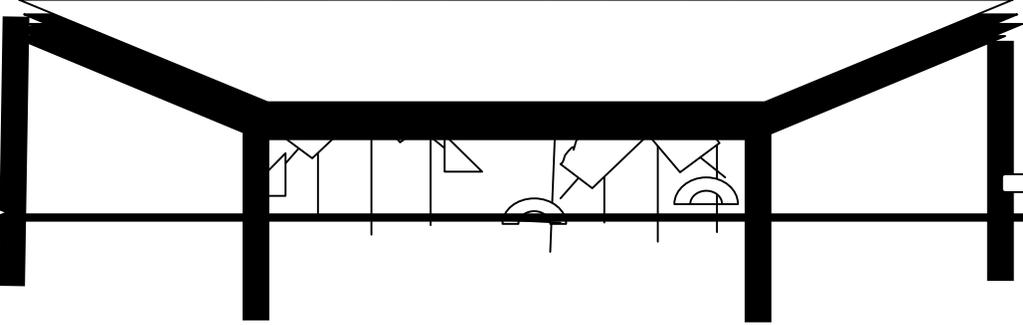

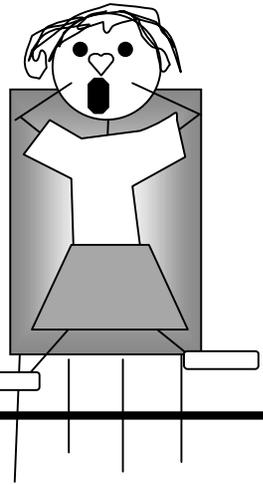

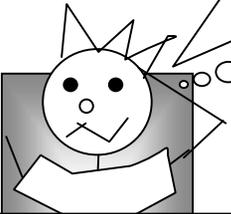

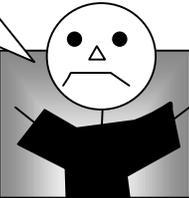

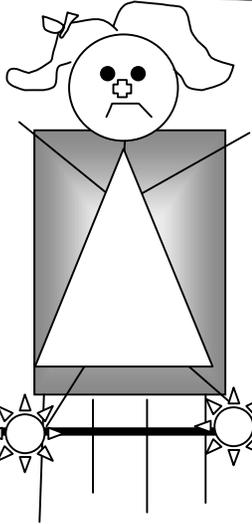

STUART!!! Multiplication is not brainwashing.

IS SO!

I can't believe all three of us can't solve these problems.

Yo! You all comin' to my birthday party tonight peeps?

You're welcome Stu. I'll come over to play with you. I have one too.

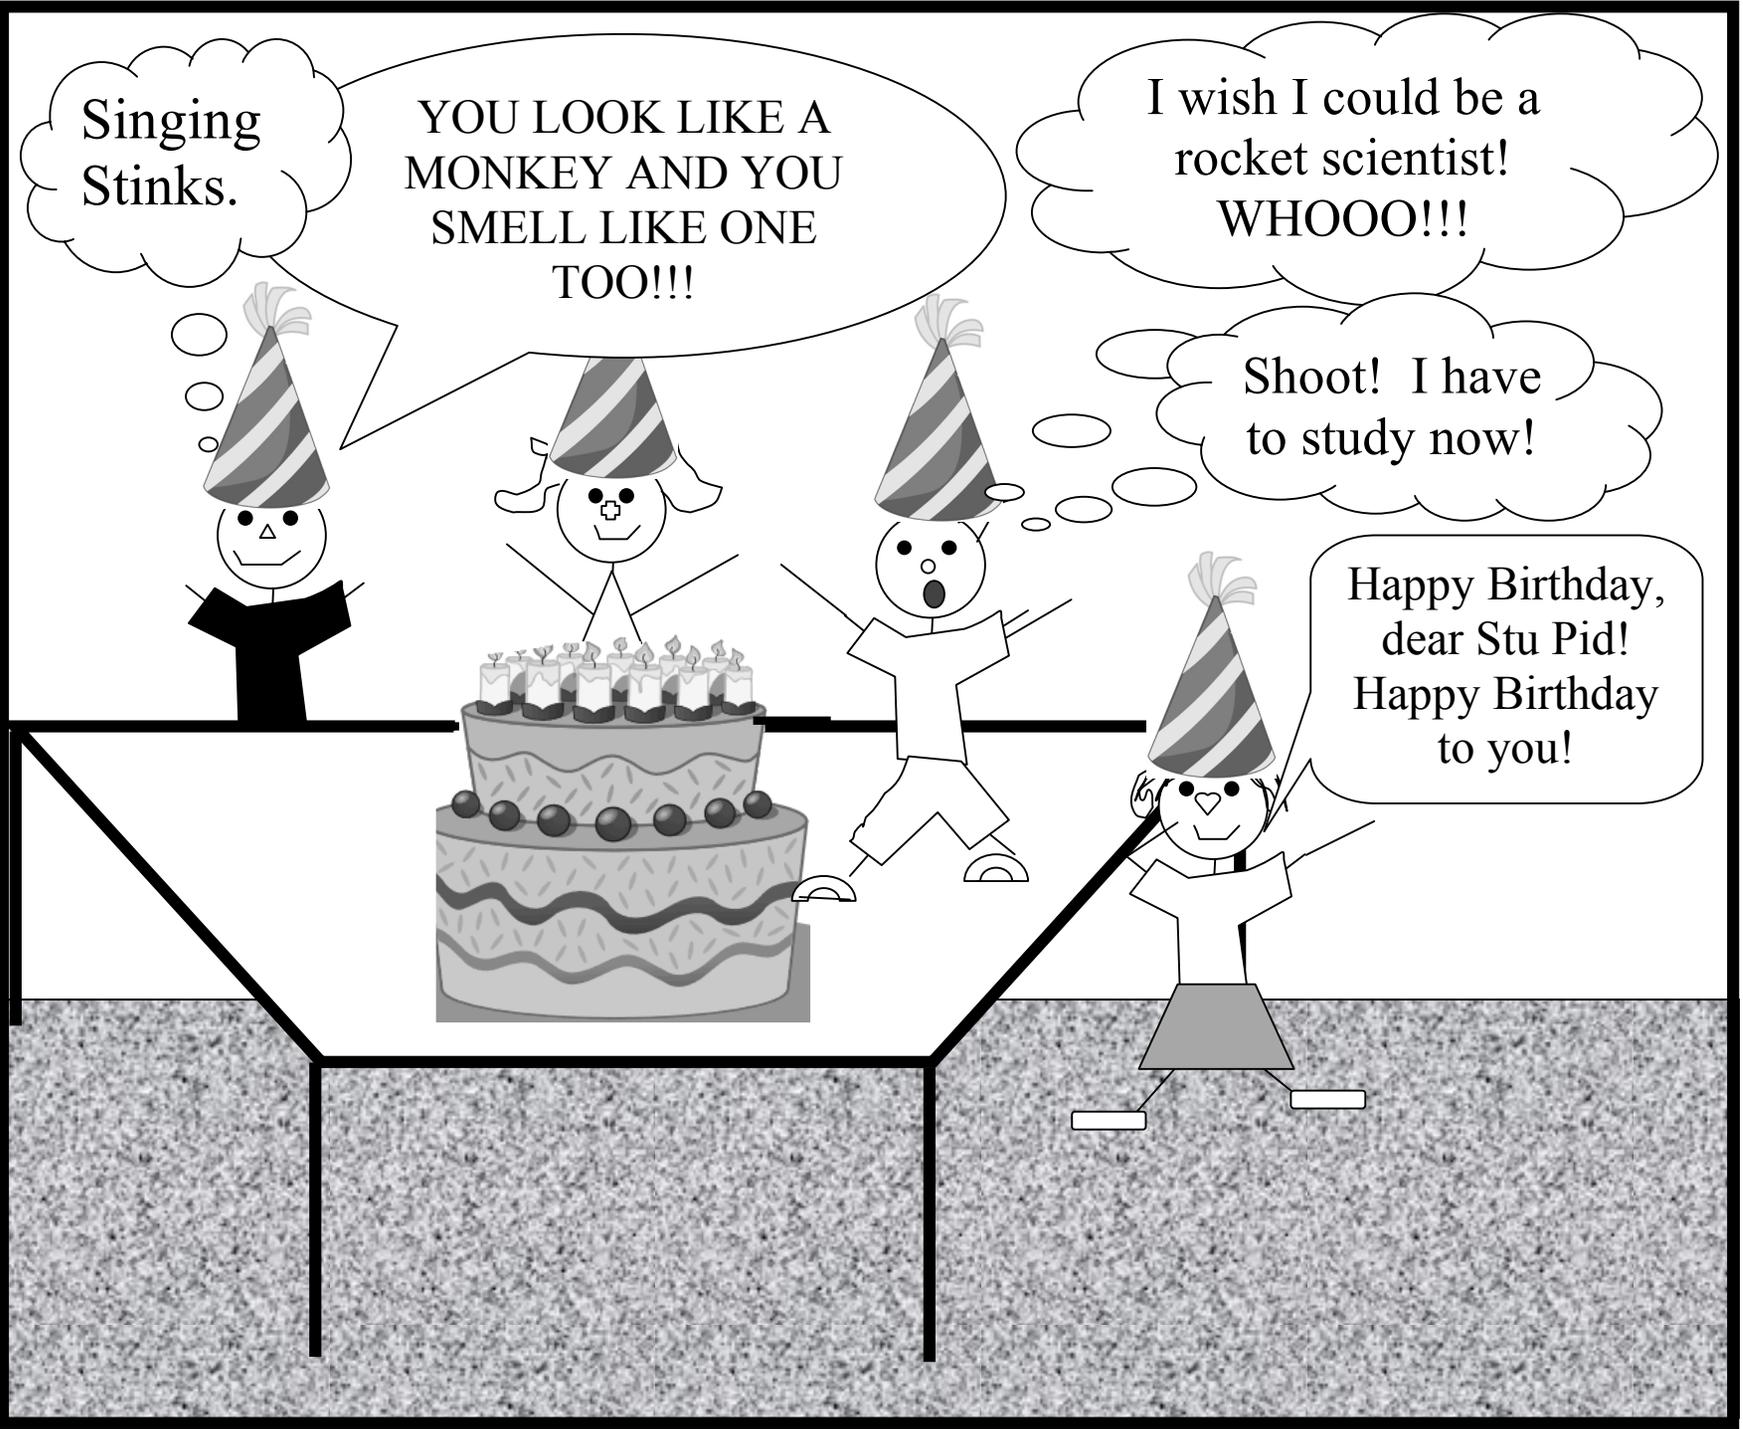

I really hope he likes the cookbook I got him.

I want to be Stu the Rocket Scientist! Sweet. Thanks for the gift, Max!

Singing Stinks.

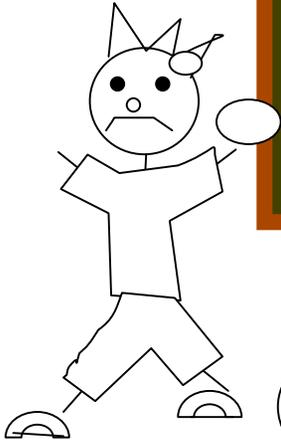

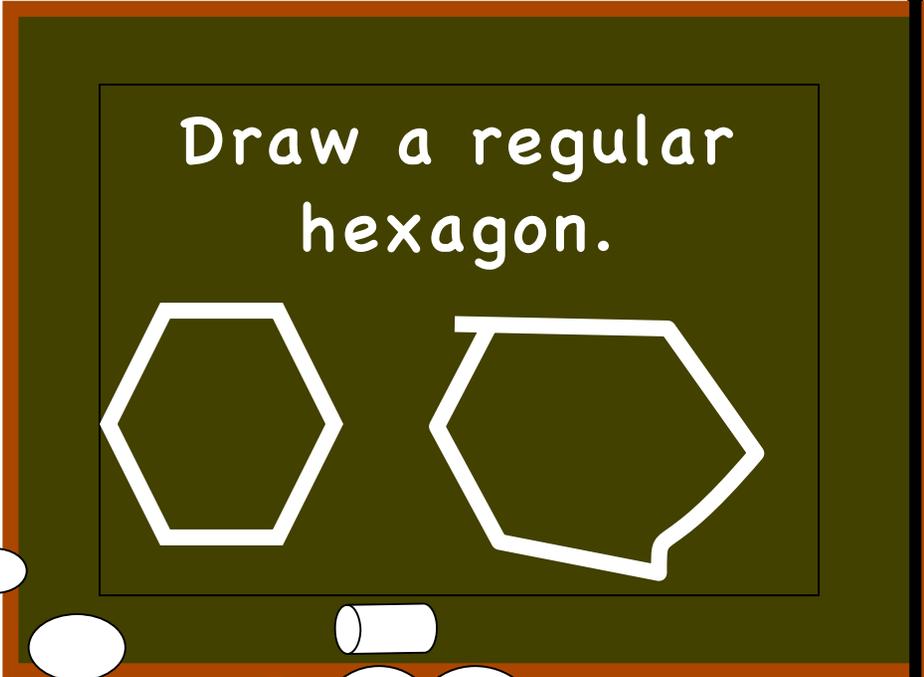

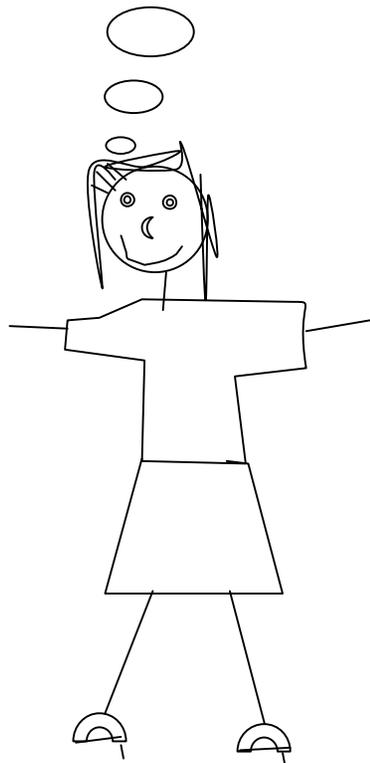

YOU LOOK LIKE A MONKEY AND YOU SMELL LIKE ONE TOO!!!

I wish I could be a rocket scientist! WHOOO!!!

Shoot! I have to study now!

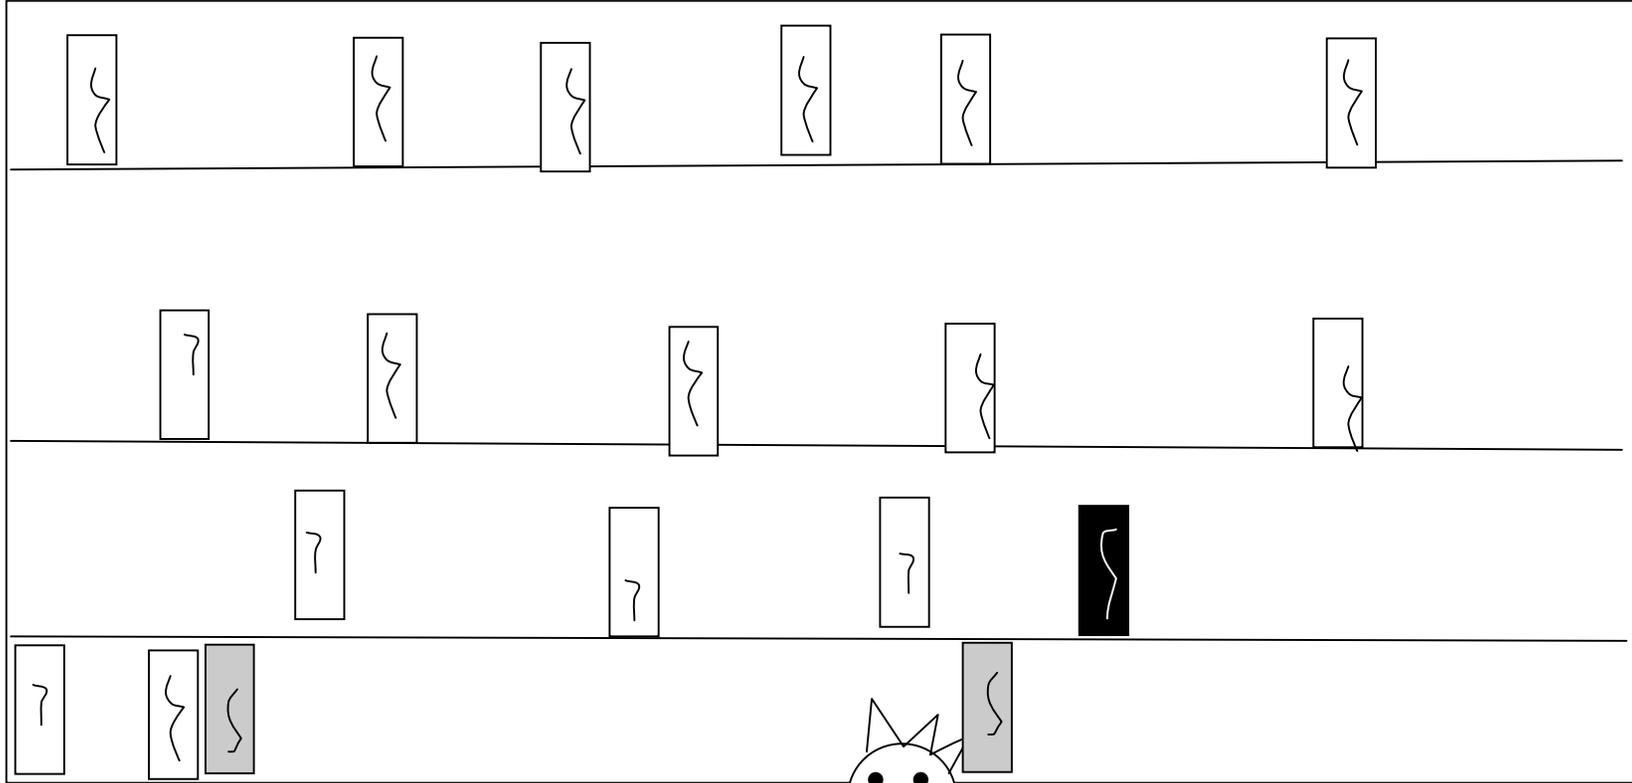

Happy Birthday, dear Stu Pid! Happy Birthday to you!

Stu is really trying hard on his work today.

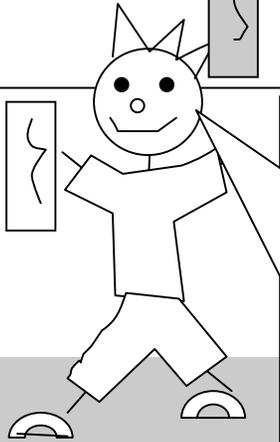

The path to becoming a rocket scientist is harder than I thought.

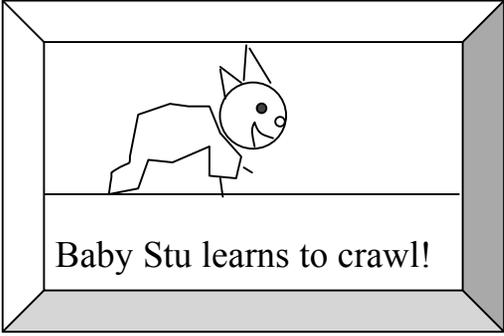

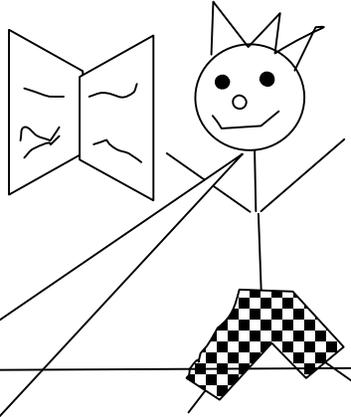

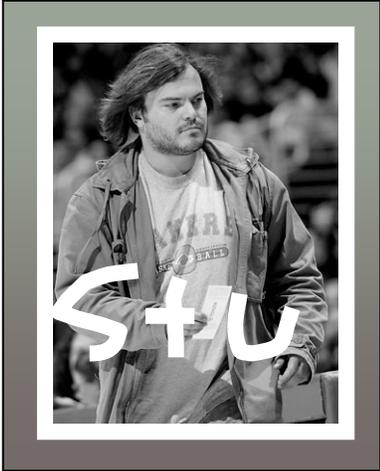

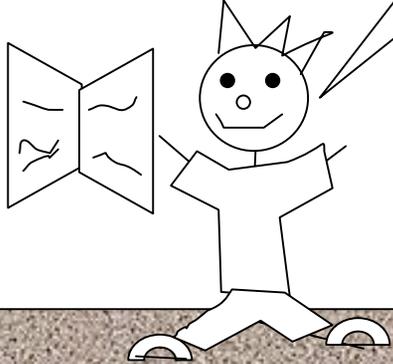

Please remember to return your books to George Lucas School Library

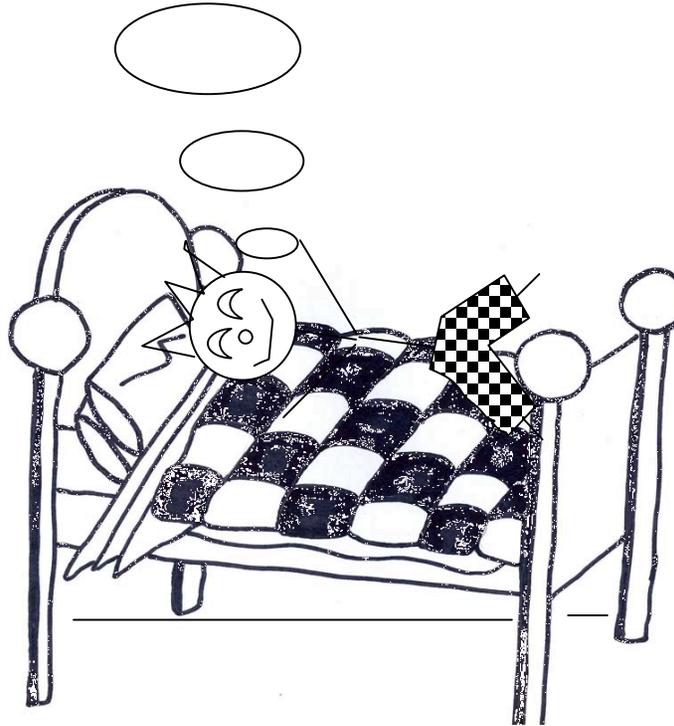

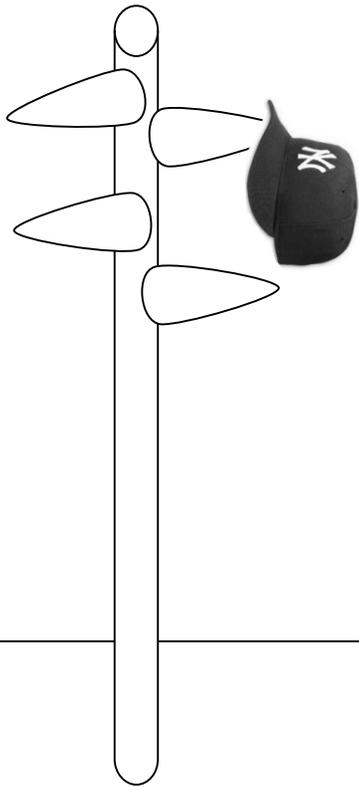

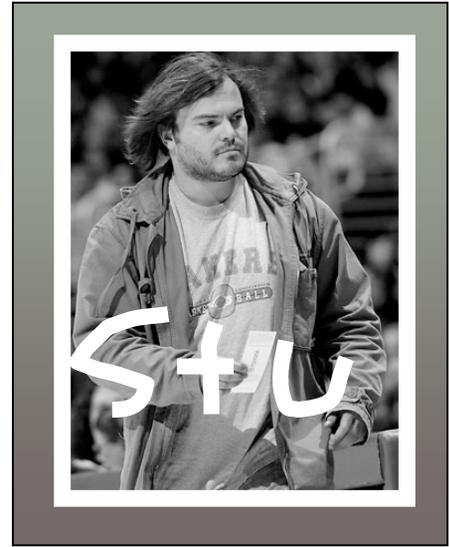

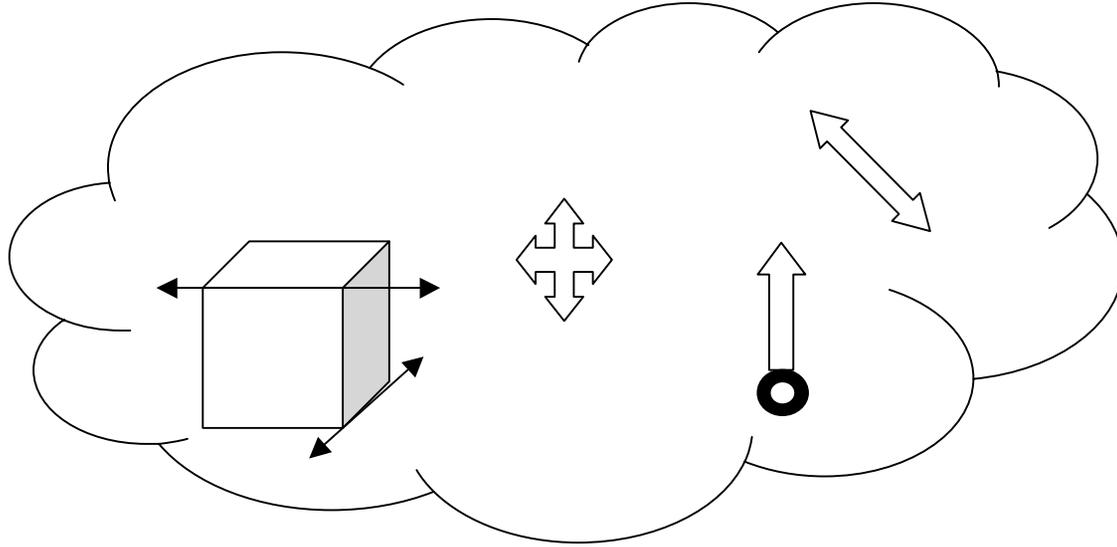

This will make me really smart! I'll know everything about geometry. One step closer to the moon in my rocket!

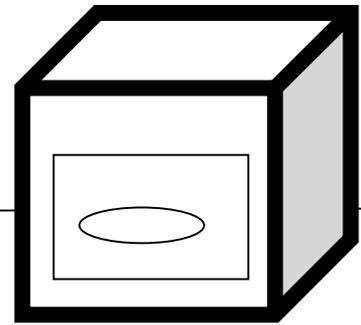

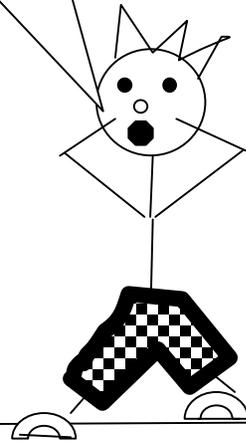

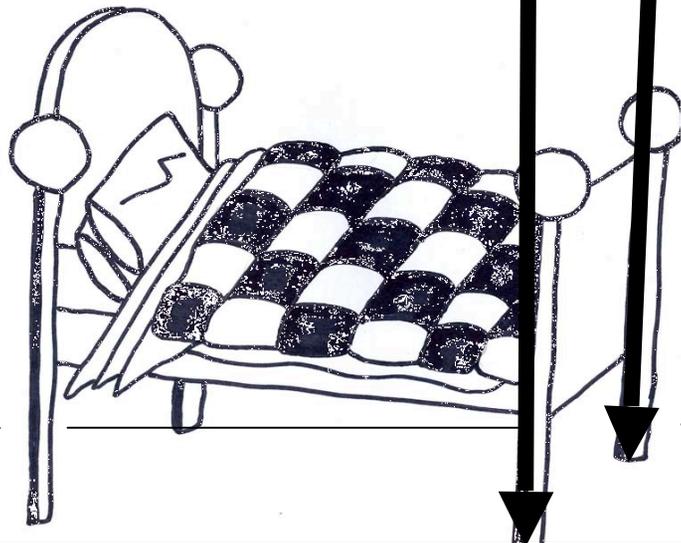

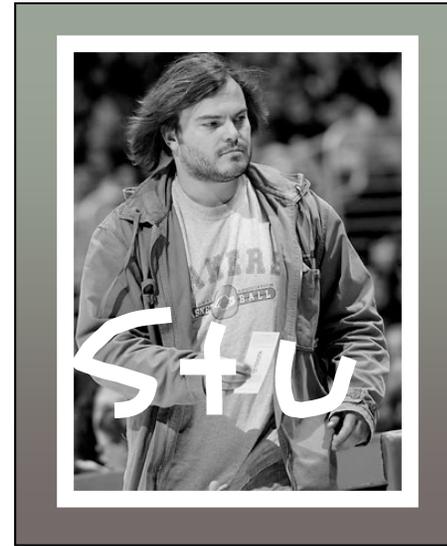

This is a hard book to read.

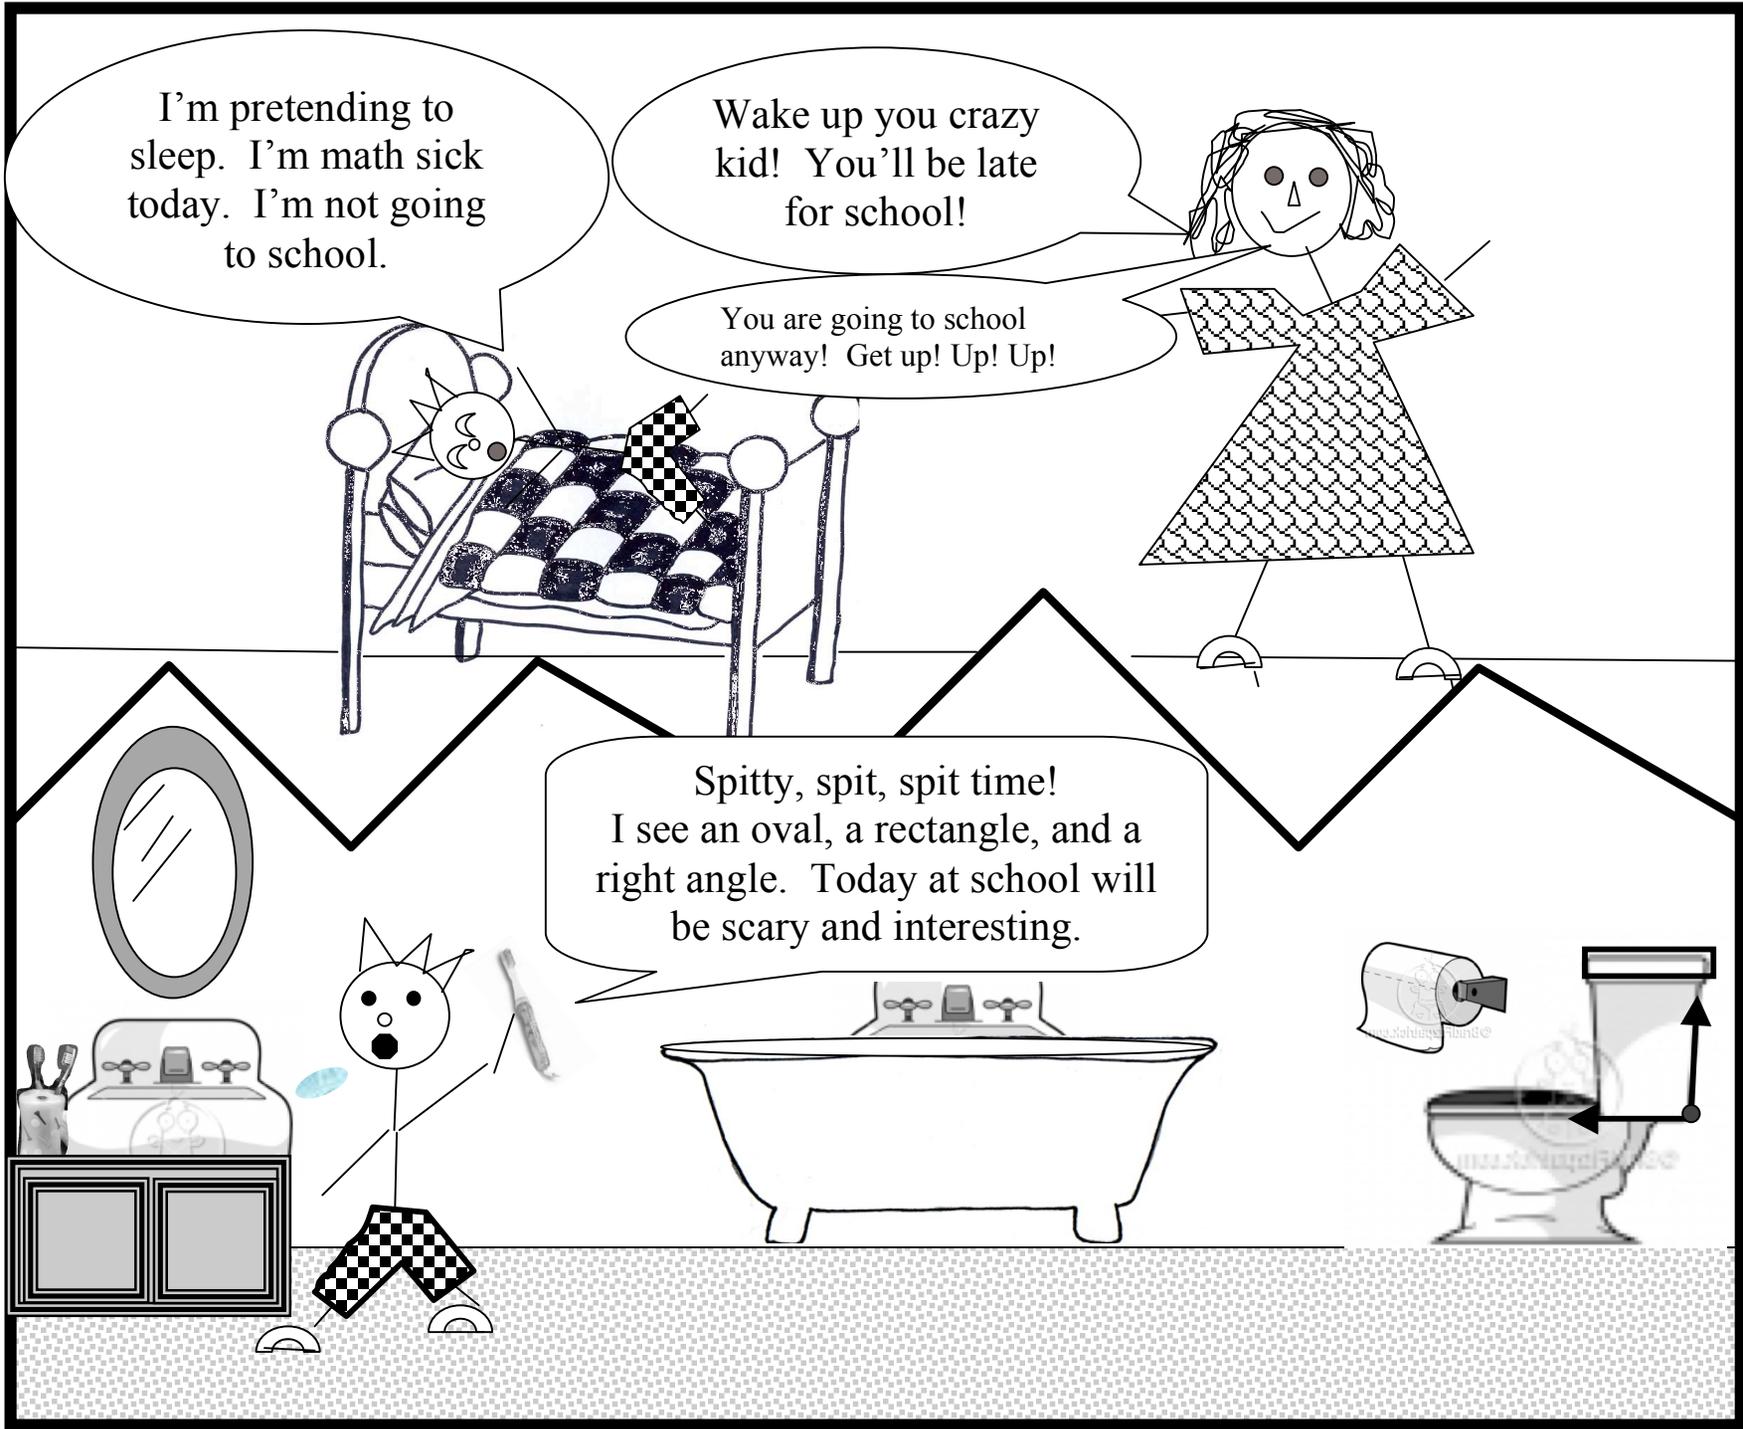

I'm goin' sleep on this tonight!

Oh my goodness this FREAKY!  
I see a quadrilateral, parallel  
lines, a concave heptagon, and a  
cube. I must be dreaming...  
WAKE UP, STU!  
WAKE UP, YOU!

I'm pretending to sleep. I'm math sick today. I'm not going to school.

Wake up you crazy kid! You'll be late for school!

You are going to school anyway! Get up! Up! Up!

Spitty, spit, spit time! I see an oval, a rectangle, and a right angle. Today at school will be scary and interesting.

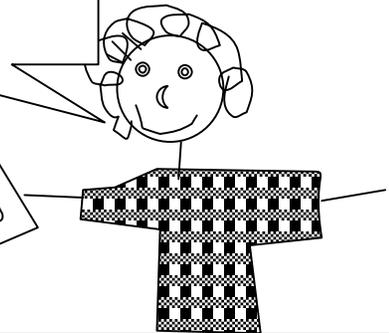

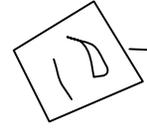

I see a squirrel and it's reflection. This math vision is driving me crazy and making me late for school!!! No one but me can see school is a nonagon and the roof of my garage is a scalene triangle.

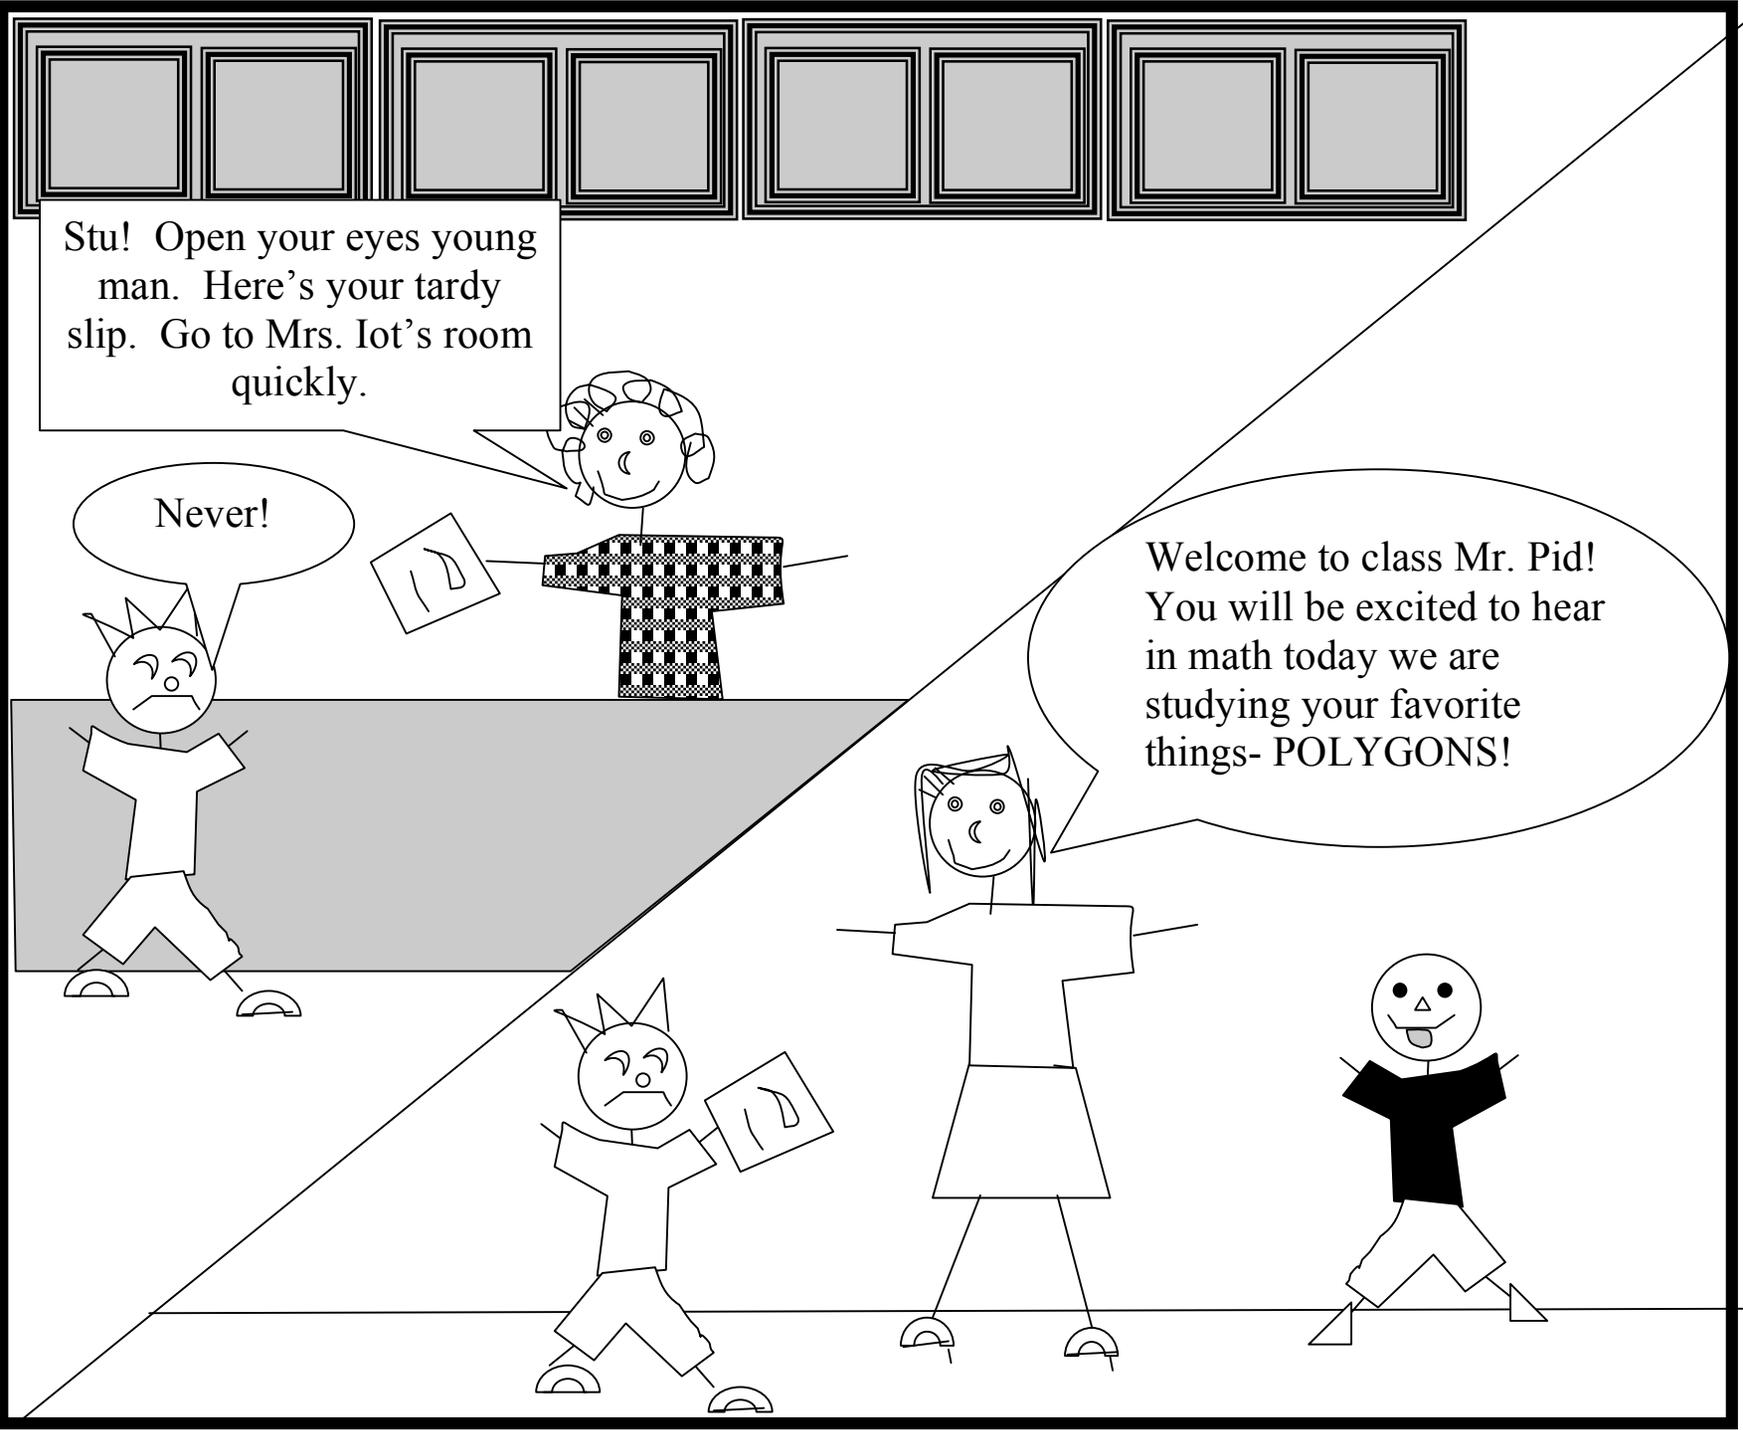

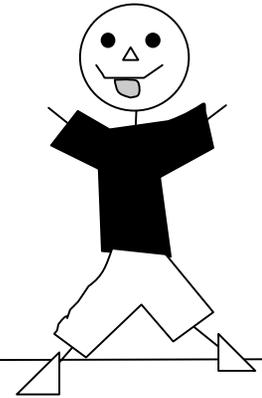

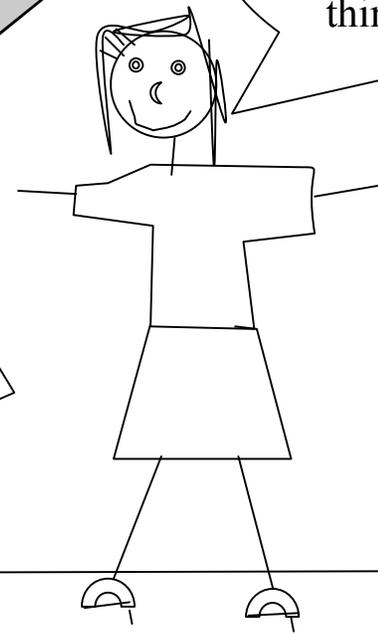

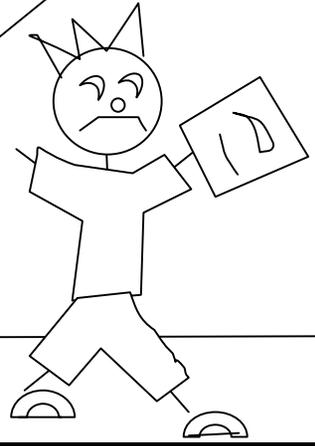

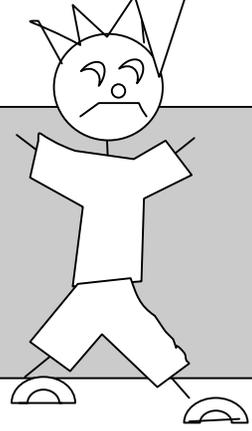

Stu! Open your eyes young man. Here's your tardy slip. Go to Mrs. Iot's room quickly.

Never!

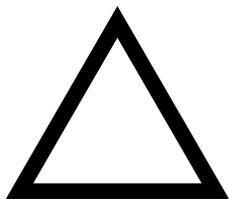

Welcome to class Mr. Pid! You will be excited to hear in math today we are studying your favorite things- POLYGONS!

Name triangles by their sides or by their angles.

isosceles

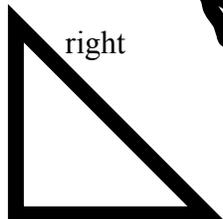

equilateral

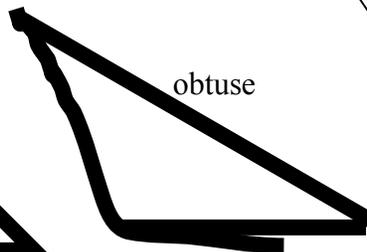

scalene

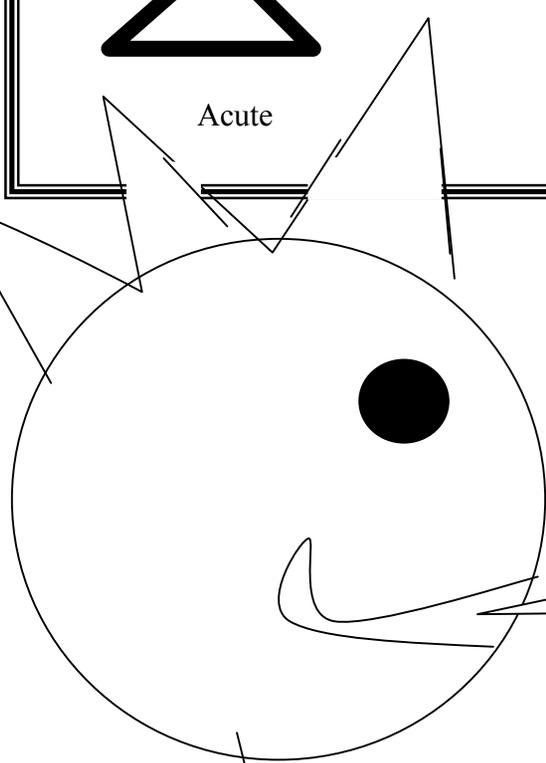

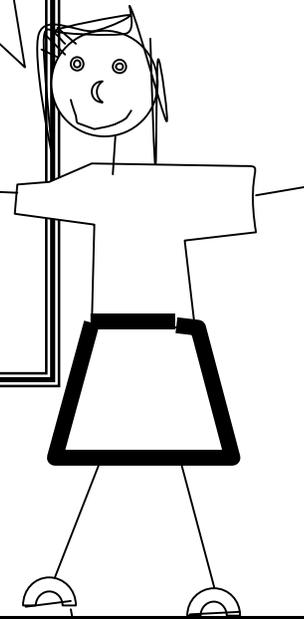

Acute

right

obtuse

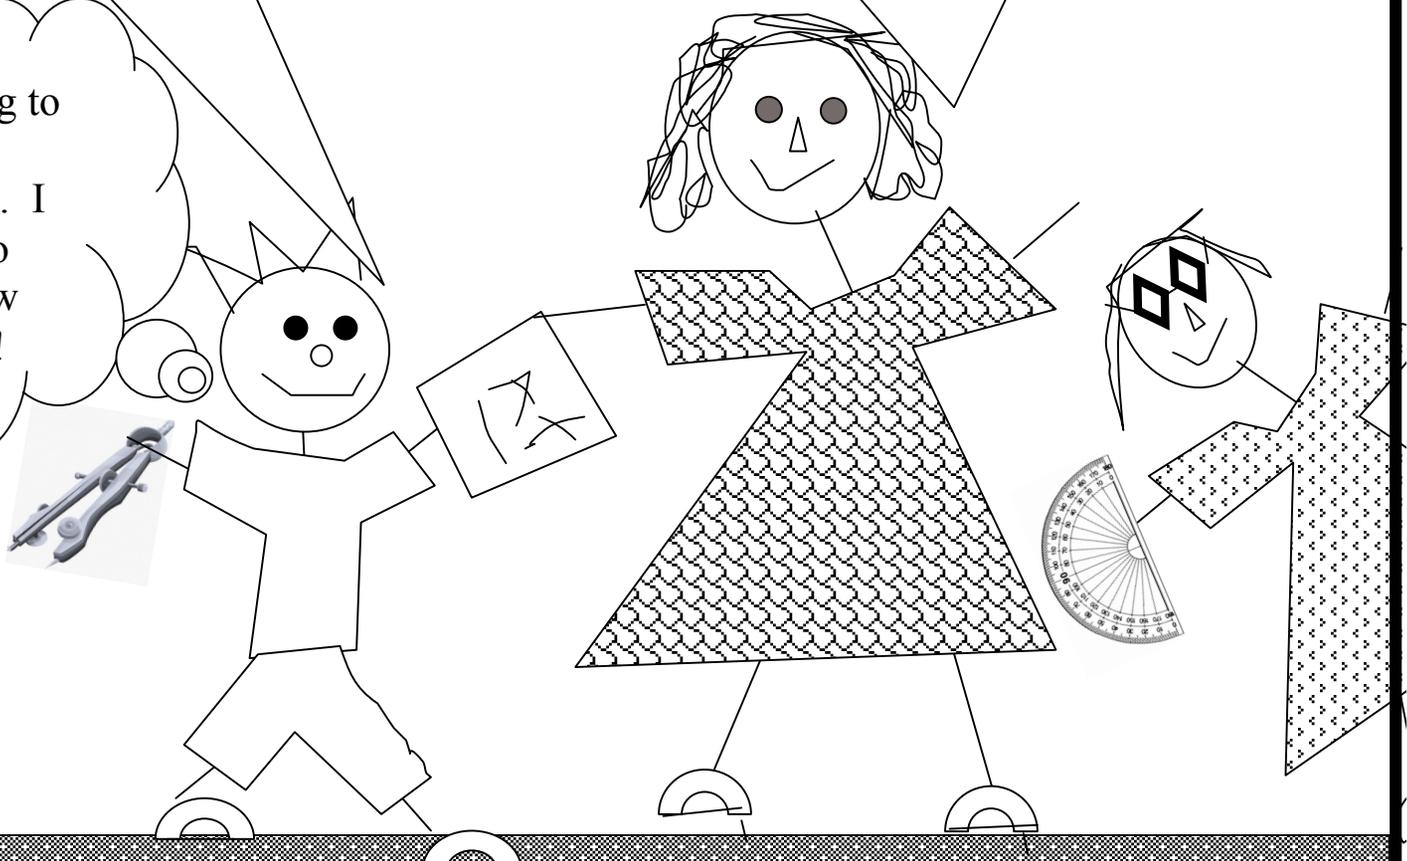

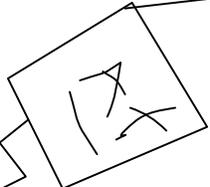

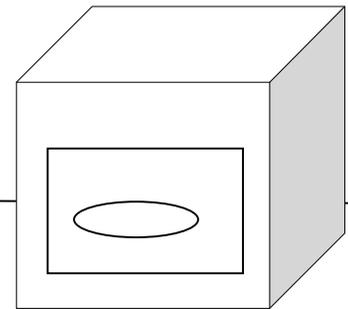

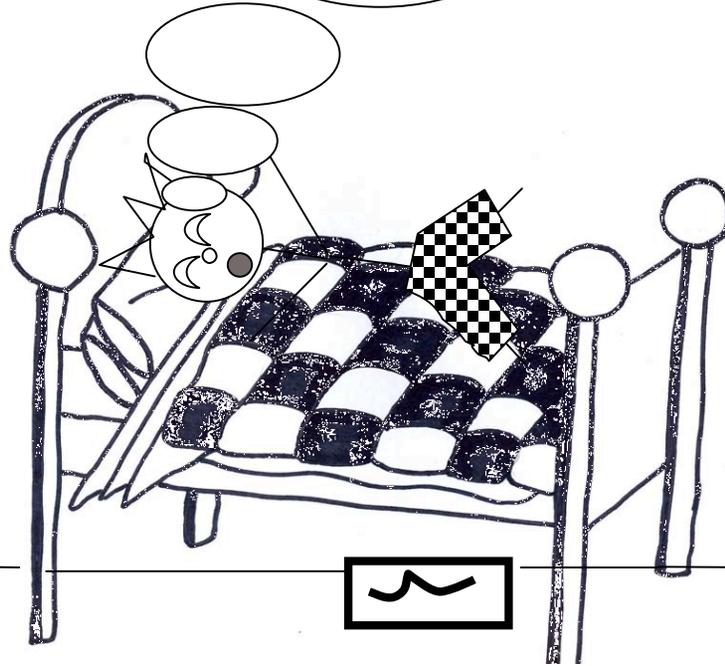

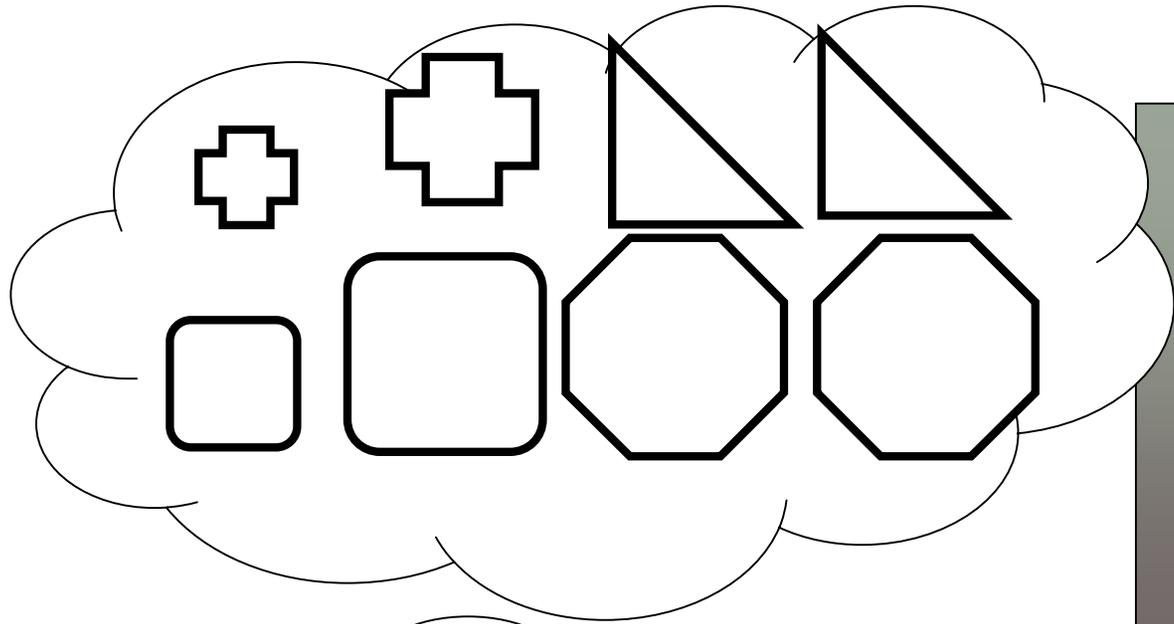

Now I get this!

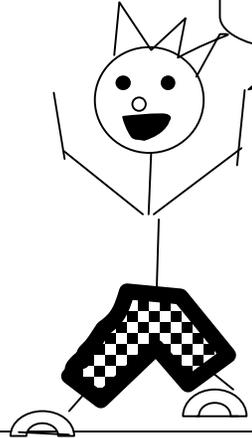

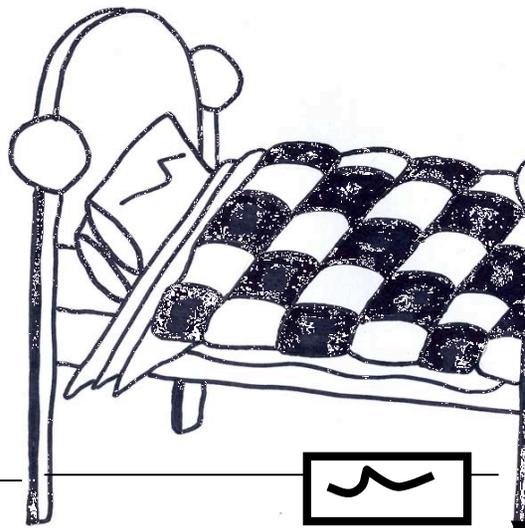

Mom, Mom! I had a great day at school today. I got an A+ on my math paper.

That is so GREAT Stu!  
Going to the library yesterday must have really helped.

I'm not going to sleep on that book tonight. I don't want to loose my new super power!

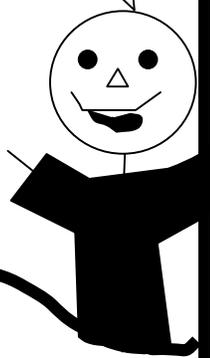

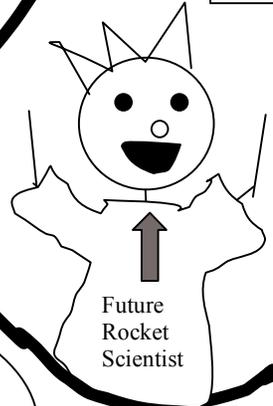

Sweet! Still have my super powers. Here I come school!!!

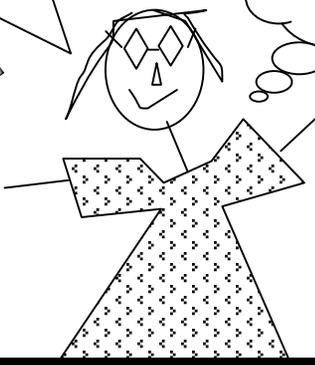

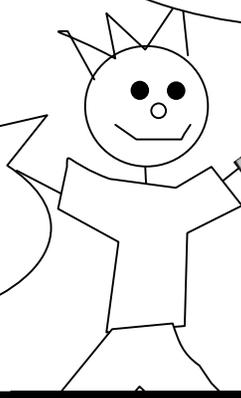

You ROCK at math Stu-ee!

Stu, you must pay me \$5.00 to do my homework! Did you cheat on your test?

My brother...the weirdo.

Here you go. No, I told you I have Math Vision!

# EPILOGUE
